

BarrelScope™ Inspection Device

BottleLogic
Anaheim, CA

APPLICATION

The Swash™ BarrelScope™ inspection device is a compact miniature lighted periscope that permits visualization of about 85% of the interior of a barrel through the bunghole to confirm construction of new barrels or effectiveness of cleaning and removing tarrates in used barrels.

PERFORMANCE

Winemakers, cellarmasters, brewers and distillers have long relied on shining a flashlight into the bunghole of a barrel and peering around the flashlight itself to get a glimpse of the bottom of the barrel to determine its condition. With this technique, there is no way to see the heads of the barrels, the more difficult part to clean by any means. An expensive and time-consuming alternative is pulling the heads of the barrels.

The Swash™ BarrelScope™ was developed to replace the common flashlight. It's durable, lightweight aluminum construction and optional belt holster make it easily carried by cellar workers to routinely inspect barrels as they are being cleaned. With its extremely high quality lenses and mirrors, and its powerful LED light source, the interior surface finish can be easily observed. Coopers can now proudly show customers the quality of construction of new barrels in a way never before possible. And buyers can confirm the quality of the interior of new barrels delivered.

FEATURES AND BENEFITS

- Powerful 200 lumen LED light source effectively illuminates the viewing area.
- High quality lenses and mirrors allow detailed inspection of the wood surface.
- Threaded focusing tube makes adjusting focus easy and effective.
- Anodized aluminum housing is lightweight and durable.
- Powered by three AAA batteries providing light for up to 7 hours.
- Shipped in a durable, foam lined, reusable storage container for protection.
- Optional belt holster keeps the device at one's side ready for use.

ORDERING INFORMATION

Model 62000 - BarrelScope™ inspection device with foam storage case.
Model 62000-H - BarrelScope™ belt holster.

ABOUT SWASH SANITIZING EQUIPMENT

Swash Sanitizing Equipment is an operating division of ARS Enterprises. ARS was established in 1971 to provide sterilizing and washing equipment and field maintenance and repair services to food and beverage firms, hospitals, laboratories, and pharmaceutical or medical device manufacturers. Our equipment and service have earned us an outstanding reputation among our customers who have come to rely on ARS.

Our philosophy is to provide dependable equipment incorporating high quality components. The ARS team is dedicated to the highest standards of workmanship. Our pride rests on your satisfaction with the products and service we provide. We believe that with ARS, you can achieve many years of reliable performance and an overall low cost of ownership.
